📄 PROFESSIONAL SUMMARY

Innovative Frontend Developer with **3+** years of experience engineering high-performance Web and Mobile applications. Expert in the **JavaScript** ecosystem (**React.js**, **React Native**, **Next.js**) with proven capabilities in **Full Stack** R&D initiatives. Specialized in building field-service tools, offline-first architectures, and hardware integrations (Thermal Printers). Strong collaborator with cross-functional teams, following **Agile/Scrum** methodologies to deliver scalable products. Proven track record of improving application performance by 40% and migrating legacy systems to modern architectures.

🧠 TECHNICAL SKILLS

Frontend Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS.

Frameworks: React.js, React Native, Next.js, Redux Toolkit, Context API.

Mobile & Hardware: Vision Camera, Geolocation, Offline Architecture (AsyncStorage), Thermal Printer SDK.

Backend & DB: Node.js, Express.js, MongoDB (MERN Stack), Firebase Auth.

Tools & Testing: Git, GitHub, VS Code, Jest, React Testing Library, Postman and Swagger.

Architecture & Performance: SPA Architecture, Lazy Loading, Debouncing, API Optimization, Code Splitting

📁 PROFESSIONAL EXPERIENCE

Ramboll | April 2024 – Present | Hyderabad, India

React Native Developer (Frontend Web & Mobile)

Project 1: National EMF Portal (NEP) - Web & Mobile

- **Legacy Migration:** Spearheaded the migration of the legacy NEP web platform (HTML/JS) to a modern **React.js**, **TypeScript**, and **Tailwind CSS** architecture.
- **Performance Optimization:** Reduced page load times by 35% and improved code maintainability by 40% through **lazy loading** and optimized **Axios** API calls.
- **Mobile Architecture:** Built the cross-platform NEP app using **React Native**, integrating **Vision Camera Compass** and **AsyncStorage** for complex angle-based panoramic image capture .
- **User Engagement:** Achieved a 20% boost in user engagement by ensuring full mobile responsiveness and implementing lazy loading for optimized navigation flow.

Project 2: Inventory & QR Management System (R&D Initiative)

- **Full Stack Logic:** Designed an end-to-end Inventory Management product, handling the React Native frontend and Node.js/MongoDB backend logic.
- **Hardware Integration:** Engineered a feature to generate dynamic QR codes for products and print them physically via **Bluetooth-connected thermal printers**.
- **Scan-to-Cart:** Implemented advanced QR scanning; scanning a label extracts product data and populates the digital cart for rapid checkout and invoice generation.

Project 3: Telecom Field Inspection App (Portal Album)

- **Field Audit Workflow:** Developed a mobile application for telecom technicians to conduct site inspections and safety audits.
- **Before & After QC:** Implemented a Quality Control workflow requiring technicians to capture "Defect" and "Resolution" images using custom camera integration.
- **Data Sync:** Utilized **AsyncStorage** to store images locally in remote areas and integrated REST APIs to sync evidence data to the central Web Portal once connectivity was restored.

Gyarala Technologies | September 2022 – February 2024 | Hyderabad, India
Software Engineer

- **E-Commerce Mobile App (Serrano):** Built a scalable mobile e-cart application using **React Native**. Developed adaptive UIs for product listings and integrated **Razorpay** SDK for secure, real-time in-app payments.
- **State Management:** Architected global state management using **Redux Toolkit** and Context API to streamline data flow across the application.
- **Admin Dashboard (Web):** Developed a comprehensive Admin Panel using **Next.js** and **Tailwind CSS** for real-time inventory management. Implemented role-based access and robust form validation using **Formik**.

EDUCATION

Bachelor of Technology
Malla Reddy Engineering College and Management Sciences

07/2019 – 08/2022
CGPA: 6.8
